

How to use the baseball sign stealer

Prediction format: Indicator then sign

First head over to the Encode button. Click it

After that it should open up white boxes you can type in
In those white boxes type the sign type like Head tap or elbow tap.

After you assign the moves you can now start using it.

In order for it to predict well it needs 2 steals and 2 no steals.

It might show the wrong prediction if you don't provide the DATA.
